

LAKSHMEEKANTA H

Full Stack Developer

✉ lakshmeekanta9611@gmail.com | 📞 +91 8861222334
📅 3+ Years' Experience | 📍 Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications using Java Spring Boot and Angular. Proven track record of delivering high-quality solutions in Agile environments, including onsite international client engagement. Skilled in microservices, API integration, and bridging the gap between client requirements and technical execution. Actively leverages AI tools including Claude, ChatGPT, GitHub Copilot, and Google Gemini to accelerate development workflows, improve code quality, and enhance problem-solving efficiency.

CORE COMPETENCIES

- Backend: Java, Spring Boot, Spring MVC, Hibernate JPA, RESTful APIs, Microservices
- Frontend: Angular, TypeScript, HTML5, CSS3, RxJS, Capacitor
- Databases: MySQL, Oracle 11g
- DevOps & Tools: Apache Kafka, Redis Cache, Git, Apache Tomcat, Wildfly
- AI Tools: Claude, ChatGPT, GitHub Copilot (Codex), Google Gemini – Prompt Engineering, Code Generation, Debugging Assistance
- Onsite & Soft Skills: Client Relationship Management, Requirement Gathering, UAT Support, Agile Coordination

PROFESSIONAL EXPERIENCE

Java Full Stack Developer | JMR Infotech | May 2023 – Present

Onsite Consultant – Tanzania (November 2025 – May 2026)

- Client Engagement: Acting as the primary technical point of contact onsite at NMB, facilitating daily communication between the client’s core team and the offshore development unit.
- Requirement Analysis: Proactively collecting client feedback and suggestions to refine application features and explaining technical constraints to the offshore team.
- Testing Support: Providing real-time application clarifications to the client’s SIT/UAT teams, ensuring rapid resolution of observations and a smooth testing phase.
- Bridge Management: Streamlining the delivery pipeline by aligning onsite business objectives with technical development sprints.

Key Achievements

- Architected and delivered 2 major enterprise applications serving 30+ team members with 99.9% uptime.
- Reduced application response time by 40% through Redis caching implementation.
- Streamlined development processes using in-house frameworks, cutting delivery time by 25%.

PROJECT PORTFOLIO

NMB – Banking UI Integration (Web & Mobile)

- Role: Onsite Full Stack Developer | Duration: Jan 2025 – Present
Technologies: Angular, Capacitor, Oracle Banking Digital Experience (OBDX)
- Cross-Platform Delivery: Built responsive web and mobile applications from a single Angular codebase using Capacitor.
- Banking Integration: Successfully integrated Oracle OBDX APIs for secure, high-stakes banking operations.

- UI/UX Implementation: Converted Figma prototypes into pixel-perfect, responsive components with dynamic light/dark mode support.
- Performance: Achieved optimal loading speeds across devices through adaptive design and performance tuning.

LivEzy – E-commerce Lifestyle Ecosystem Platform

- Team Size: 30 | Duration: 15 Months | Technologies: Spring Boot, Angular, Microservices, Kafka, Redis, AOP
- Backend Architecture: Designed scalable Spring Boot applications with Spring MVC framework to handle high-volume transactions.
- Frontend Development: Built responsive Angular components using Angular Material for optimal UX and seamless interactions.
- API Integration: Developed comprehensive RESTful API suite for robust client-server communication.
- Real-time Communication: Implemented Apache Kafka for efficient, asynchronous messaging between microservices.
- Monitoring & Debugging: Created a centralized logging system using Aspect-Oriented Programming (AOP) for enhanced system monitoring and faster issue resolution.
- Performance Enhancement: Integrated Redis Cache, achieving 60% faster data retrieval and improved system response times.
- Documentation: Maintained centralized Swagger API documentation, significantly improving team collaboration and integration efficiency.
- Agile Delivery: Consistently delivered complex sprint goals within designated timelines using Scrum methodology.

EDUCATION

Bachelor of Engineering | Poojya Doddappa Appa College of Engineering | CGPA: 8.14/10.0

AI TOOLS & PRODUCTIVITY

- Prompt Engineering: Crafted precise, context-rich prompts using Claude and ChatGPT to generate boilerplate code, debug complex issues, and produce technical documentation – reducing research and coding time by up to 30%.
- Code Quality & Review: Used GitHub Copilot (Codex) for AI-assisted code completion and inline suggestions within the IDE, improving coding standards and catching potential issues early in the development cycle.
- Research & Problem Solving: Leveraged Google Gemini and ChatGPT to rapidly explore unfamiliar frameworks, compare architectural approaches, and generate solution options – accelerating sprint delivery and reducing blockers.
- API & Integration Assistance: Used AI tools to understand Oracle OBDX API structures and generate integration test cases, significantly speeding up the onboarding and implementation phases at NMB.

ADDITIONAL INFORMATION

Languages: English, Kannada, Hindi, Telugu

Interests: Technology Innovation, Travel, Sports, Cinema
